

Infant and Early Childhood Mental Health (IECMH)

graduate. interdisciplinary. 100% online.

- **Fall 2020**
 - Learn about the intergenerational transmission of caregiver-child relationship dynamics in more vulnerable families and implications for functioning at all ages. *IECMH 537 Attachment and Psychopathology: Parents & Infants.*
- **Winter 2021**
 - Use a diversity and developmentally-informed lens to gain a solid foundation in observation, assessment and diagnosis of early childhood social, emotional and behavioral problems (birth – five). *IECMH 555 Relationship-Based Mental Health Assessment of Young Children.*
- **Spring 2021**
 - Develop foundational knowledge in the growing field of IECMH, including typical and atypical child development and risk and resiliency factors that shape life span trajectories. *IECMH 548 Frameworks in Infant and Early Childhood Mental Health.*

Open to University of Washington graduate students and community graduate non-matriculated (GNM) students. If interested in learning more, please contact the Faculty Lead on IECMH, Dr. Colleen O. Dillon (codillon@uw.edu) at the [Barnard Center](#).
