

CURRICULUM VITA

DATE: April 14, 2025

NAME: Monica Oxford

WORK ADDRESS: University of Washington, Box 357920

TELEPHONE: 206-685-6107

EMAIL: mloxford@uw.edu

EDUCATION:

1990 Arizona State University, Tempe, AZ, BS, Justice Studies (*summa cum laude*)
1995 University of Washington, Seattle, WA, MSW, Social Work
2000 University of Washington, Seattle, WA, Ph.D. Social Welfare

PROFESSIONAL EXPERIENCE

2020	Child, Family, and Population Health Nursing	Kathryn Barnard Endowed Professor for Infant Mental Health
2017- 2014-	Barnard Center for Infant Mental Health and Development Child, Family, and Population Health Nursing, University of Washington Seattle, WA	Executive Director Research Professor
2021-2024	Child, Family, and Population Health Nursing	Vice Chair Research
2011- 2009-	Center on Human Development and Disability Parent-Child Relationship Programs, University of Washington, Seattle, WA	Research Affiliate Executive Director
2009-2014	Child, Family, and Population Health Nursing, University of Washington, Seattle, WA	Research Associate Prof.
2007-2009	School of Social Work, University of Washington Seattle, WA	Research Associate Prof.
2007-2009	Parent-Child Relationship Programs, University of Washington, Seattle, WA	Director of Program Development
2001-	Graduate Faculty Appointment University of Washington Seattle, WA	Graduate Faculty
2001- 2007	School of Social Work, University of Washington Seattle, WA	Research Assistant Prof.
2000-2001	Young Women's Health Study, Social Work University of Washington, Seattle, WA	Research Analyst
1996-2000	Social Development Research Group, Social Work University of Washington, Seattle, WA	Research Analyst
1996	The Office of Children's Administration Research State of Washington, Seattle WA	Research Analyst II
1995	Developmental Research Unit The Casey Family Program, Seattle, WA	Research Assistant
1991-1994	Mental Health Professional Community Psychiatric Clinic, Seattle, WA	Intensive Case Manage
1986-1990	Occupational Therapy Department Westbridge Psychiatric Hospital, Phoenix, AZ	Activities Director

RESEARCH EXPERIENCE/FUNDING

- 2024-29 **Principal Investigator, Oxford, and MPI's Shalev, Dow-Smith. National Institutes of Health, NINR R01 (NR021020-01).** Exposure to early-life adversity is a significant source of stress for young children, and is unequally distributed across groups, with minoritized people experiencing the greatest levels of adversity leading to gaps in mental and physical health. This proposal will test if Promoting First Relationships (PFR), an evidence-based 10-week home visiting program, delivered within a primary care setting, will operate as a protective factor against cellular aging in young children as measured by telomere length and epigenetic aging clocks. We will also evaluate the effectiveness of PFR adapted to a Primary Care setting.
- 2023-28 **Principal Investigator, Oxford; National Institutes of Health, NICHD R01 (R01 HD111433-01).** *Delivering Evidence-Based Parenting Services to Families in Child Welfare Using Telehealth.* This study is a randomized experimental design testing the effectiveness of an intervention administered by community-based service providers to child welfare involved parents. This study is a test of the effectiveness of a home visiting service delivered by telehealth.
- 2022-25 **Co-Investigator, Oxford; PI Margaret Kuklinski. Foundation for Opioid Response Efforts.** This project aims to increase resilience and mitigate trauma in Washington State (WA) children whose caregivers have opioid use disorder (OUD) by reaching families in recovery with culturally responsive, inclusive evidence-based family-focused interventions (EBIs).
- 2021-24 **Co-Investigator, Oxford; PI, Amritha Bhat, National Institutes of Health R34. A Dyadic Approach to Perinatal Depression Treatment in Primary care (1R34MH124798).** This project will test a user centered design adaptation of an evidence-based parenting intervention *Promoting First Relationships* (PFR). We will test this adaptation within a comprehensive perinatal depression treatment model in a collaborative care setting. We will focus on important mediators of worsened postpartum depression (decreased parenting self-efficacy and impaired mother-infant interaction), and test if PFR improves both maternal and child outcomes.
- 2017-23 **Principal Investigator, Oxford; National Institutes of Health, R01 HD090176- 01, *Intervention to improve outcomes for foster children reunited with their birth families.*** This project seeks to assess the effectiveness of Promoting First Relationships (Kelly et al., 2008) with toddlers and preschool aged children in child welfare who have recently been reunited with their birth parent after a foster care separation. We will partner with Washington State and NAVOS, Community Mental Health, to implement this community based clinical trial of effectiveness. Total direct costs are 1,965,770.
- 2021-22 **Co-Investigator, Oxford; PI, Carrie Dow-Smith. WakeMed Foundation Clinical Research Award Foundation. The LAUNCH+ Project: A longitudinal Approach to Understand the Relationship between Early Adversity and Accelerated Biological Aging.** Early adversity has been linked to range of negative social, cognitive, physical, and mental health outcomes across the life span. The purpose of the proposed study is to better understand the underlying mechanism between early adversity and accelerated biological aging.
- 2020-21 **Co-Investigator, Oxford; PI, Lyndsay MacKay, Child Health and Wellness Grand Challenge Catalyst Seedling Award, University of Calgary. *Enabling Quality Interactions with Parents (EQUIP).*** This project is aimed at developing a coding strategy using artificial intelligence to code parent-child interaction via the Parent-Child Interaction

Teaching Scales developed by Dr. Kathryn Barnard.

- 2018-20 **Co-Investigator, Oxford; PI-Amritha Baht, UW ALACRITY Grant, *Modification of a Parenting Intervention for Primary Care Based Delivery to Women with Perinatal Depression and Anxiety: Promoting First Relationships – Brief*.** Women with Postpartum Depression and Anxiety (PDA) frequently experience parenting challenges which are associated with both worsening postpartum depression and negative child outcomes. This study will improve usability of a parenting intervention for delivery in conjunction with Collaborative Care for PDA in primary care, with the goal of enhancing access to PFR for women with PDA. Total direct costs are \$50,000.
- 2017-18 **Principal Investigator, Oxford; Research Intramural Funding Program, School of Nursing. *New Methods for Coding Parent-Child Relationships within a Sample of Maltreated Infants and Toddlers*.** The purpose of this proposal is to assess a highly-innovated method for coding parental-child interaction that can account for child outcomes over and above traditional methods of coding caregiver sensitivity. *Fragmented and Unpredictable parental behavior* (FRAG). FRAG coding, discovered in labs assessing rodent caregiving models, was recently applied to a sample of human parent-child dyads. We will evaluate the utility of this coding method within a sample of maltreated infants and toddlers. Total direct costs are \$15,000.
- 2016-21 **Consultant, Oxford; PI- Tryphonopoulous.** Canadian Institutes of Health Research. *Video-Feedback Interaction Guidance for Improving Interactions Between Depressed Mothers and their Infants*. To evaluate a brief home visiting program for infants and their caregivers. Funding amount: CAD 569,552
- 2015-21 **Co-Investigator (Oxford), PI-Susan Spieker, National Institutes of Health, NICHD R01 HD080851-01A1. *Collaborative Perinatal Mental Health and Parenting Support in Primary Care*.** The goal of this research is to conduct a randomized controlled trial to evaluate the effectiveness of adding a research-based 10-week home visiting parenting program to Evidence-Based depression treatment, to counter the pernicious effects of mothers' depression on parenting quality and infant development. Participants will be English and Spanish- speaking low-income mothers who began publicly funded depression treatment in pregnancy at their primary care community health centers.
- 2013-21 **Multiple Principal Investigator, Oxford; with MPI's Booth-LaForce & Buchwald, National Institutes of Health R01, *A Primary Prevention Trial to Strengthen Child Attachment in a Native Community*.** This project seeks to partner with a tribe in Montana to implement infant mental health services using Promoting First Relationships in a community-based partnership. We will train local providers to implement services using a distance learning program. Once trained community providers will implement a clinical trial using a wait-list control design. Total direct costs are \$1,818,972.
- 2013-14 **Principal Investigator, Oxford; Royalty Research Fund, University of Washington. *Examining Biomarkers of Emotional Regulation in a Sample of Maltreated Toddler*.** The proposed study provides an opportunity for the investigators to augment an ongoing, longitudinal, clinical trial of a 10-week home visiting intervention with maltreated infants and toddlers. In the parent study (R01HD061362-02: PI- Oxford) families are receiving one of two interventions in a clinical trial of Promoting First Relationships (PFR; Kelly et al., 2003). We propose to collect additional physiological indicators of emotional regulation of infants and toddlers in this sample, specifically respiratory sinus

arrhythmia (RSA) during a home visit. Total direct costs are \$40,000.

- 2012- 17 **Co- Investigator, Oxford; PI-Cathryn Booth-LaForce, National Institutes of Health P20 NIMHD Exploratory Centers for Excellence.** *Promoting First Relationships: Primary Prevention in Two Native Communities.* An R01 within a P20, in collaboration with UW School of Medicine and Washington State University. MPIs—John Roll & Dedra Buchwald: Behavioral Health Collaborative for Rural American Indian Communities. Total direct costs for the center are \$5,444,386.
- 2010- 17 **Principal Investigator, Oxford. National Institutes of Health, NICHD RO1: HD061362-01A2 Training Social Work Providers: Intervention for Infants and Toddlers Exposed to Maltreatment.** This project seeks to test the effectiveness of a relationship-based intervention program (PFR) on reducing child maltreatment and enhancing both parent and child outcomes. This project is also aimed at enhancing social service practice to meet the developmental needs of infants and toddlers. Total direct costs are \$2,071,794.
- 2006 – 12 **Co-Principal Investigator, Oxford; PI- Susan Spieker, National Institutes of Health, NIMH, R01 MH077329- 01: Infant Mental Health in Child Welfare: Community-based Participatory Research.** This is an intervention study within the child welfare community in Washington State. With multiple community partners in Washington State we have designed a study to test the effectiveness of an attachment-based intervention study on infants entering foster care in order to reduce psychopathology in children, attachment disorders, and resulting problems with serial placements in the foster care setting. Total direct costs are \$2,036,263.
- 2008 – 10 **Principal Investigator, Oxford, National Institutes of Health, NICHD: RO3 HD054428-01. Intersecting Ecologies of Risk and Early School Adaptation.** This study examines and tests a model of school adaptation under an ecological perspective which captures variation in context, family, environment, and school simultaneously. Total direct costs are \$200,000.
- 2009 –10 **Co- Principal Investigator, Oxford; PI J. Kelly. Boeing Corporate Citizenship Grant.** *Promoting First Relationships in a Child Care.* This is a training grant; this grant provides funding to train child care consultants serving Snohomish and Pierce County to use Promoting First Relationships [PFR] as a service aimed and enhancing child care providers' caregiving capacity. Total direct costs are \$60,000.
- 2003 – 08 **Co-Principal Investigator, Oxford; PI Lew Gilchrist, National Institute of Health, NIDA, R01 DA05208-15. Tandem Risk: Outcomes for Children of Teen Mothers.** A longitudinal study of adolescent mothers and their children with a life course perspective. This study examines the links between the life course of adolescent mothers and their children's behavioral, social, emotional, and cognitive outcomes. Total direct costs are \$2,337,446.

TRAINING/SERVICE CONTRACTS/Proviso

- 2024-2025 Received a WA State Legislative Proviso to develop a workforce strategy to expand, diversify, train and retain the WA State Infant and Early Childhood Mental Health Workforce.
- 2021-ongoing Child-Parent Psychotherapy, Principal Investigator, Monica Oxford, Perigee Fund. This is a training grant to disseminate the CPP training to cohorts of therapists who provide

clinical services to children impacted by trauma and adversity. This is a reoccurring contract, we are training our third cohort.

- 2014 –ongoing Principal Investigator, Oxford. Washington State Department of Child, Youth and Families. *Promoting First Relationships Training Child Welfare Providers*. This is a training contract that provides funding to train providers throughout Washington State to be certified to provide PFR to families in the child welfare system. Reoccurring annually, ~ 100,000.
- 2014 –ongoing Principal Investigator, Oxford. King County Children and Family Commission. *Promoting First Relationships in a Community Setting*. This is a training grant that provides funding to train providers in community service agencies serving highly stressed families. Promoting First Relationships [PFR] is an intervention program aimed and enhancing parenting capacity and child outcomes. Reoccurring annually, ~ 70,000.
- 2016 –ongoing Principal Investigator, Oxford. Department of Early Learning. *Promoting First Relationships Training in Early Intervention*. This is a training contract that provides funding to train Early Intervention providers throughout Washington State to be certified to provide PFR to families in the Early Intervention System and to train some agencies to the level of Train the Trainer. Reoccurring annually, ~120,000
- 2019- ongoing Principal Investigator, Oxford. Perigee Fund. Workforce Development in Infant and Early Childhood and Mental Health. Funded by the Perigee Fund. This five-year grant will fund the development and dissemination of an advanced clinical post-graduate training program in infant mental health and development.
- 2022-2023 Co-Investigator, Oxford; Principal Investigator, Amritha Baht at the Maternal-Child Mental Health Program in Psychiatry and Behavioral Sciences. This grant funded by Perigee Fund supports an Extension for Community Health Outcomes (ECHO) project that infuses Perinatal Mental Health for People with Substance Use Disorders and Parent-Infant Care for professionals serving the perinatal population
- 2019 – 2022 Principal Investigator, Oxford. Seattle-King County Public Health Best-Start for Kids, Prenatal to Five Workforce Development. This grant will fund continuing workforce development training grants for those in the field serving infants and young children.
- 2020-2020 Principal Investigator, Oxford. Health Care Authority. This multifaceted grant provided in part to the Barnard Center for Infant and Early Childhood Mental Health for three projects for providers who serve women with Opioid Use Disorder. Projects include training health care professionals and case managers working in the PCAP program.
- 2019-2019 Co-Investigator, Oxford; Principal Investigator Ira Kantrowitz-Gordon. Health Care Authority. This multifaceted grant provided in part to the Barnard Center for Infant and Early Childhood Mental Health for three projects for providers who serve women with Opioid Use Disorder. Projects include training and materials development for service and intervention with nurses and health care professionals.
